WooCommerce Spam Orders

WooCommerce · https://websbyamy.com/support/docs/woocommerce-spam-orders/

To combat spam orders (dozens of 'failed' orders that come in hourly), you can add the plugin 'reCAPTCHA for WooCommerce' from the WordPress repository.

CLICK HERE for the video on how to install the plugin and configure it.

But if you login and specifically see the following warning when you go to >Dashboard >WooCommerce: "Activate PayPal Fraud Management" after logging in (see image below):

CLICK HERE for a video on how to Activate and configure this.

You can also open a trouble ticket if these don't answer your questions or if this went over your head.
